

Marian Boswall's Garden Studio at Godinton

ADVANCED PLANTING DESIGN

This course combines horticultural knowledge and professional design techniques to explore the art of creating beautifully planted spaces that stand the test of time.

From developing a successional planting plan for year round interest, to achieving different styles for different places, we work through what it takes to create both harmony and the 'wow' factor in planting design.

Based in the lovely house and grounds at Godinton, the structured course includes illustrated teaching sessions with notes, followed by project work to develop your own design ideas. We will also visit gardens both nearby and further afield to see examples of great planting in inspirational styles and spaces, and discuss what lessons can be learnt.

8 sessions are held between April - September at Godinton and local gardens on Thursday mornings from 9.15 - 12 noon (2pm ish if visiting further afield).

Course fee is £400 plus entry to gardens (via own or shared cars).
Classes are small to allow time to concentrate on individual projects.
(Project work is optional but most people do it!)
