

“THE GARDEN IS A
MANNERED MICROCOSM
OF THE LAND AROUND
IT... A STUDY OF
THE FIELDS BEYOND”

MARIAN BOSWALL

WINNER Marian Boswall MSGD
CATEGORIES Grand Award and
joint winner of Large Residential Garden

This recently extended and refocused house needed to be grounded in the surrounding landscape, so designer Marian Boswall created a design for the two-acre garden based on a series of allées and avenues with trees and oak arbours, to define areas and direct views. The owner, who trained as a botanist, wanted pollinator-friendly planting, and the design includes densely planted borders, wildflower meadows and a pond with boardwalk, as well as a potager, orchard and nuttury. The judges said there is ‘a great synergy of materials and wonderful links between the different areas, which give the garden an elegant and calm pace. It fits perfectly into the setting and shows a great attention to detail’.
